Experienced Systems Analyst with over 5 years of experience in iOS mobile application development. Proven track record of working effectively in both on-site and remote environments, collaborating with international teams, and utilizing project management and communication tools for efficient remote work. Passionate about technology and always seeking ways to improve efficiency and user experience.

Relevant Experience

Senior Systems Analyst · Ciudad Maderas September 2022 - July 2024

- Developed and maintained iOS mobile applications with polished interfaces, ensuring high-quality content experience and functional stability under an MVVM architecture.
- Managed unlisted iOS Mobile applications distribution via Apple Connect for clients and employees without direct device access.
- Built web applications using Node.js, React, NestJS, GraphQL.
- Created and published an Alexa skill using Lambda AWS.
- Collaborated remotely to integrate React and iOS mobile applications, utilizing Cincel, Google Cloud Storage, and Metamap for a digital investing platform.

Junior Systems Analyst · Ciudad Maderas February 2020 - September 2022

- Maintained and developed new features for existing iOS mobile applications, managing, also, their availability in the Apple Store using Xcode and the Apple Connect platform.
- Implemented Facebook Marketing tools to collect user statistics and improve the company's various iOS Mobile applications.
- Collaborated remotely with cross-functional teams using tools like Slack, Zoom, Google Meet, and GitHub to ensure timely and high-quality project delivery.
- Built and delivered technical solutions according to stakeholder business requirements.

Independent App Developer · Waisoft November 2018 – December 2019

- Developed and maintained iOS mobile applications for clients in Argentina, Spain, and France.
- Worked remotely using Google Meet and GitHub to deliver quality applications.

Trainee · Truper January — June 2018

- Developed a Business Intelligence desktop application to automate reporting tasks for the procurement department using C#, VBA from Microsoft and ABAP from SAP
